BIZ SIM CUP 2026

Manufacturing Game Introduction (workshop)

Manufacturing Game Extended (školní kolo soutěže)

Role v týmu (zadávací formuláře)

1. Ceny produktů (3 distribuční kanály – DC10, DC12, DC14)
2. Plánování objednávek surovin (plán, MRP, objednávka)
3. Výdaje na marketing
4. Plánování výroby

Role v týmu (reporty)

FINANCIAL STATEMENTS

Financial Statements (F.01)

1. In *Company Code*, enter your <company code>*
2. GUI step
   Select ALV Tree Control

   FIORI step
   In *Statement Version*, enter **SIM1**
3. GUI step Execute

   FIORI step Go

STOCK LEVELS

Inventory Report (ZMB52)

Shows stock levels for both finished products and raw materials

Shows quantities of raw materials reserved for production

CASH FLOW

Liquidity Planning (ZFF7B)

Displays an estimate of your cashflow for the coming weeks

PROCUREMENT TRACKING

Purchase Order Tracking (ZME2N)

Shows the details and the status of each purchase order

Shows the dates of expected goods delivery

Procurement Sourcing (ZME13)

Shows the price of each raw material sold by vendors

PRODUCTION SCHEDULE

Production Report (ZCOOIS)

Shows released production orders

For each order, the time released, started and finished (or to start and finish if incomplete)

If Target Qty > Conf. Qty production is still pending

PRODUCTION COST

Product Cost Planning (ZCK11)

Shows variable and fixed costs for each finished product

Recalculates costs based on production capacity and productivity level

Shows daily amounts of fixed costs (overhead, depreciation and S, G & A)

SALES AND MARKET DATA

Summary Sales Report (ZVC2)

Shows aggregate daily sales by product

Detailed Sales Report (ZVA05)

Shows sales related info such as sales revenue by region

Price Market Report (ZMARKET)

Shows aggregate market sales data of past 5 days

Nut

$$-F01 $$-F11	500g 1kg

20% wheat*
30% oat*
20% nut*
1 box / 1 bag*

*minimum

Blueberry

$$-F02 $$-F12	500g 1kg

20% wheat*
30% oat*
20% blueberry*
1 box / 1 bag*

*minimum

Strawberry

$$-F03 $$-F13	500g 1kg

20% wheat*
30% oat*
20% strawberry*
1 box / 1 bag*

*minimum

Raisin

$$-F04 $$-F14	500g 1kg

20% wheat*
30% oat*
20% raisins*
1 box / 1 bag*

*minimum

Original

$$-F05 $$-F15	500g 1kg

20% wheat*
30% oat*
1 box / 1 bag*

*minimum

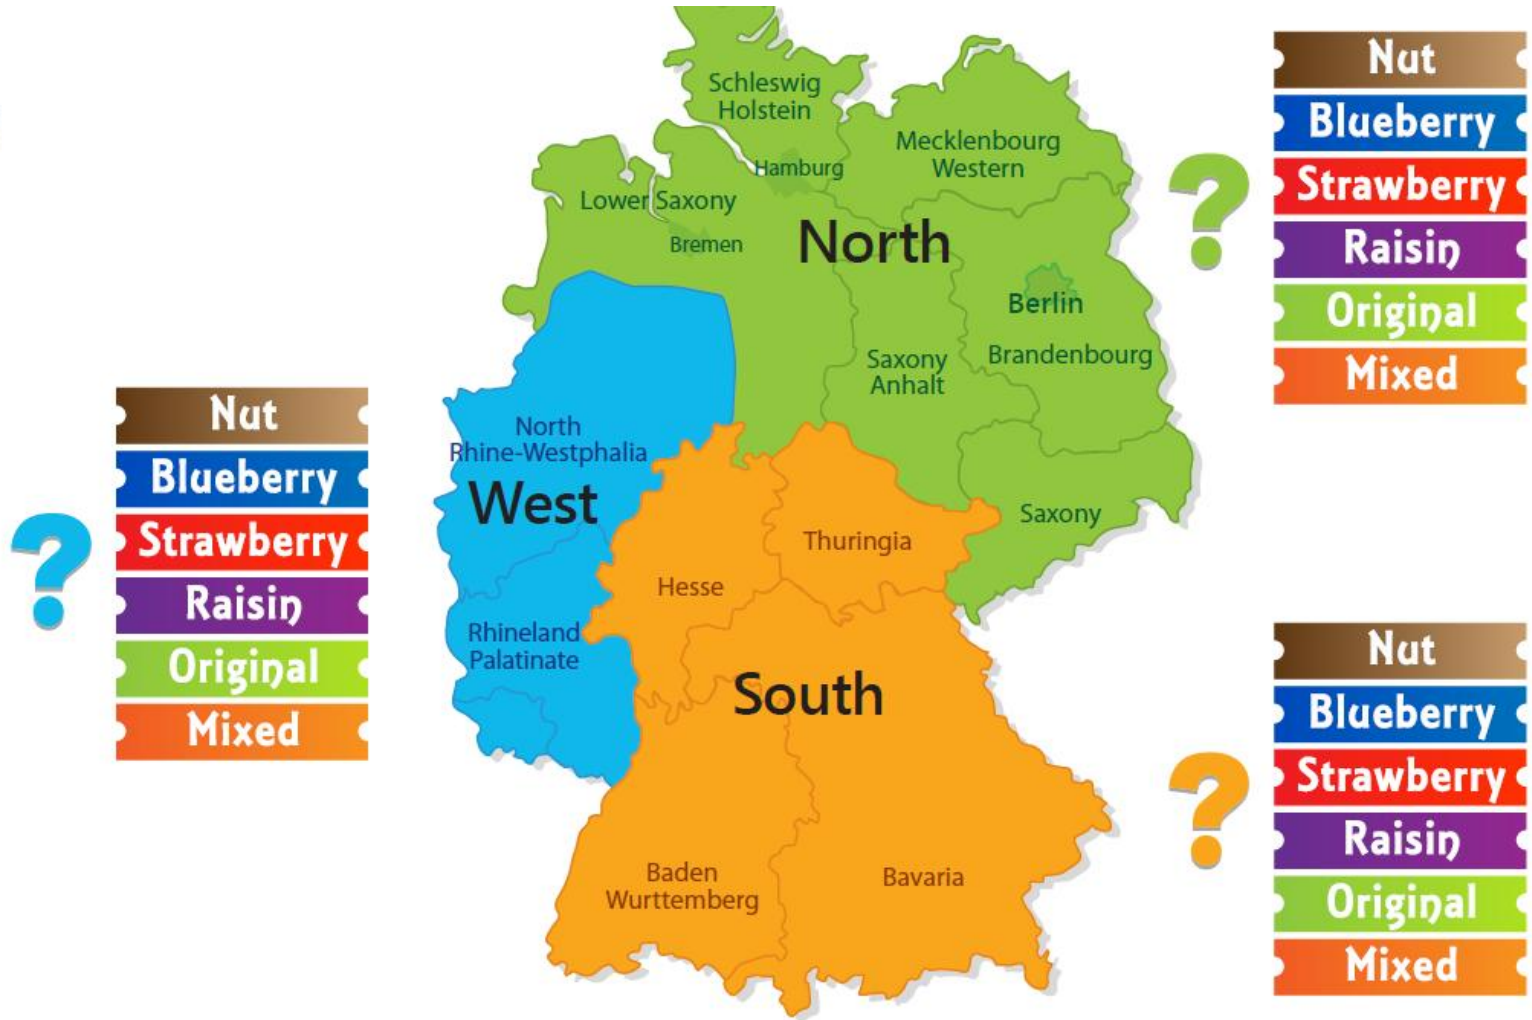

Mixed

$$-F06 $$-F16	500g 1kg

20% wheat*
30% oat*
30% fruits & nuts**
1 box / 1 bag*

*minimum
**At least some of all fruits/nut

Each region has unique preferences related to the products it wishes to purchase from your company.

$$\text{Company Value} = \frac{\text{Yearly Profit}}{\text{Company Discount Rate}}$$

$$= \frac{[((\text{Current Profit} - \text{Setup}) / \text{Nb. Rounds Played}) * 12\ ] + \text{Setup}}{\text{Market Risk Rate} + \text{Company Risk Rate}}$$

Where Setup = Setup Time Reduction Expense

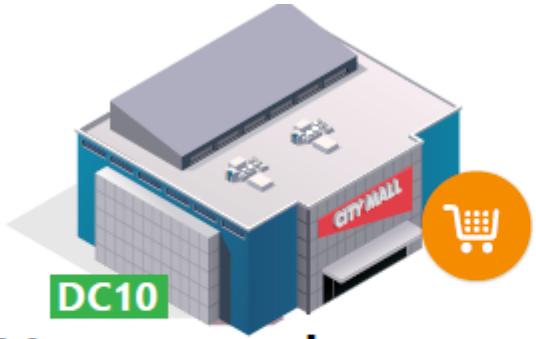

This formula is adapted from the standard Dividend Discount Model (DDM) for stock valuation, assuming no growth and 100% dividend payout.

The Major Rules

1. No stock, no sales.
2. Customer preferences do not change throughout the same game.
3. The company displaying the highest company valuation at the end of the simulation wins the game.
4. You must behave ethically at all times.
5. The end of game inventory will be valued at cost price in the final balance sheet. Therefore, you shouldn't sell under cost at any time during the game.

Elements of a Winning Strategy

1. Use the ERP system efficiently
2. Delays, production capacities and liquidity constraints are important elements of the game
3. Explore different strategies and learn from mistakes
4. Team organization is more important than you think
5. *Have fun!*

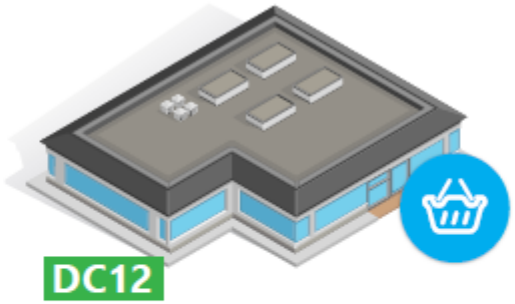

Hypermarkets

- Only buy large boxes (1kg)
- Order 3 products at a time
- Payment delay of 20 days
- Very high sensitivity to price
- Low sensitivity to advertising

Approximate Market Size

- €90 000 per team per week (5 days)

Grocery Stores

- Buy all sizes of boxes (1kg and 500g)
- Order 4 products at a time
- Payment delay of 10 to 20 days
- High sensitivity to price
- Medium sensitivity to advertising

Approximate Market Size

- €360 000 per team per week (5 days)

Independent Grocers

- Only buy small boxes (500g)
- Order 1 product at a time
- Payment delay of 1 to 20 days
- Medium sensitivity to price
- High sensitivity to advertising

Approximate Market Size

- €135 000 per team per week (5 days)

STORAGE CAPACITY AND COSTS		
Product type	**Current space**	**Cost per additional 50 000 units***
Finished products	250 000 boxes	€500/day
Raw materials	250 000 kg	€1 000/day
Packaging (bags and boxes)	750 000 units	€100/day

FIXED COSTS (€ paid each 5 days)*	
Labor	20 000
Manufacturing overhead	15 000
S, G & A	40 000
Depreciation (Building)	1 250
Depreciation (Equipment)	50 000**

**Billed Automactically*
***Investing in additional capacity will increase equipment depreciation costs*

- No starting inventory
- New €8 000 000 bank loan to finance production capacity improvements
- €24 000 000 in machinery and equipment after investment
  - 24 000 units / day in capacity
- 8 hours setup time

Investice

- Přenastavení výrobní linky
- Kapacita výrobní linky
- Splátka půjčky

Production Capacity Increase

- A bank loan of **€8 000 000** has been invested in production capacity to increase your Initial production capacity from **16 000 to 24 000 units / day**. You also have the option to increase it further.

Setup Time Reduction

- Initial setup time of **8 hours** between production runs of two different products with the option of reducing it by spending in lean manufacturing.

LOAN REPAYMENT

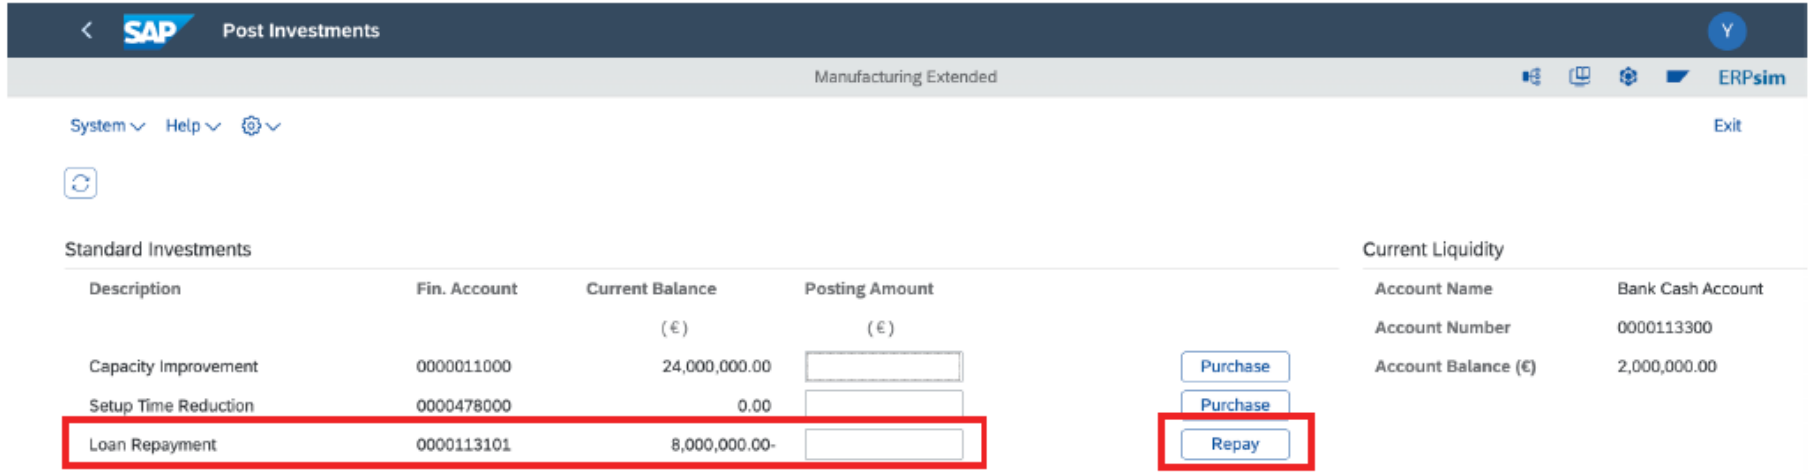

G/L Account Posting (ZFB50)

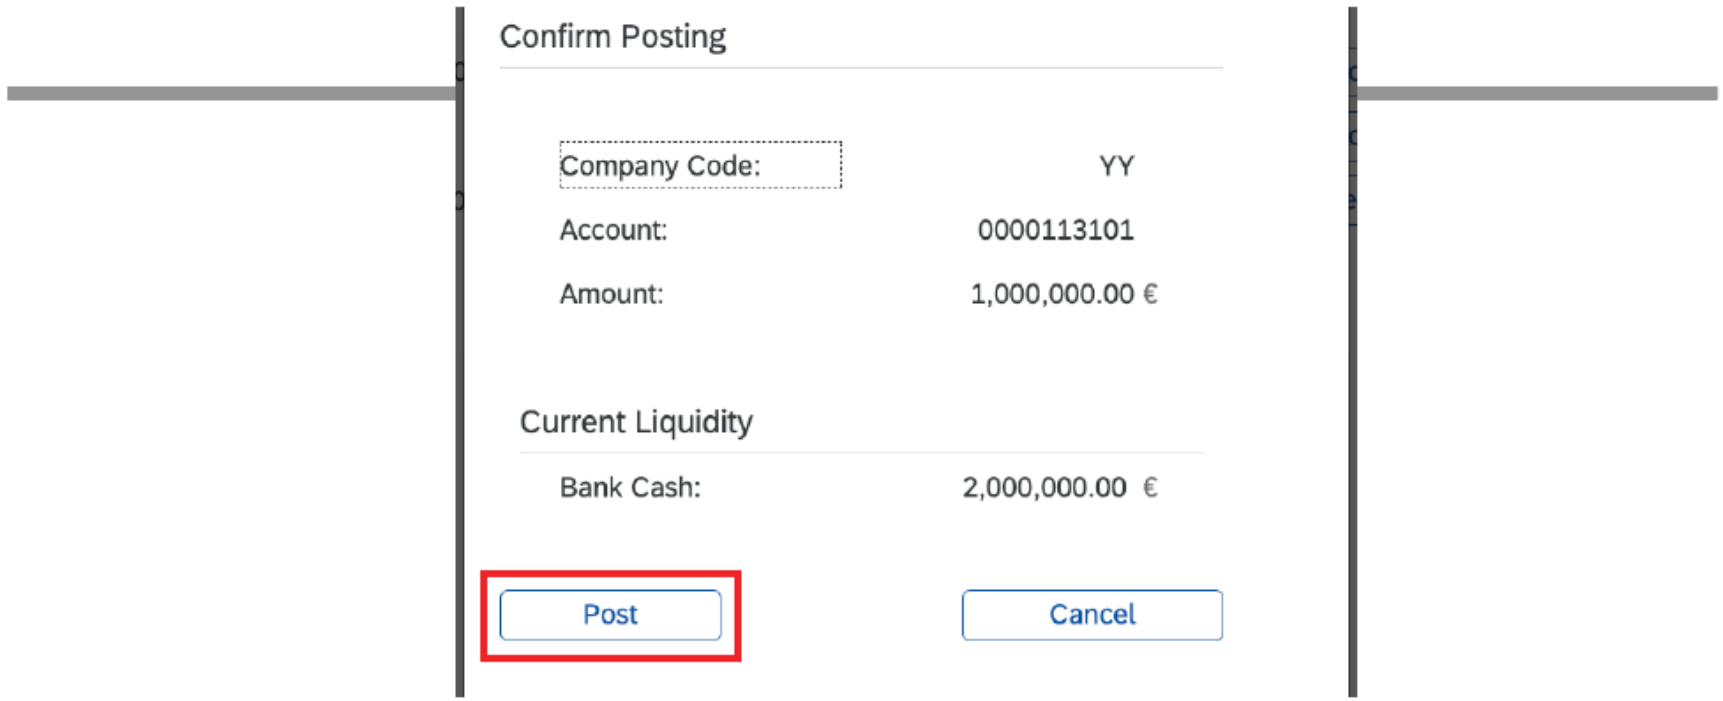

1 Under *Standard Investments*, in *Loan Repayment* line:

2 Enter the *Posting Amount*

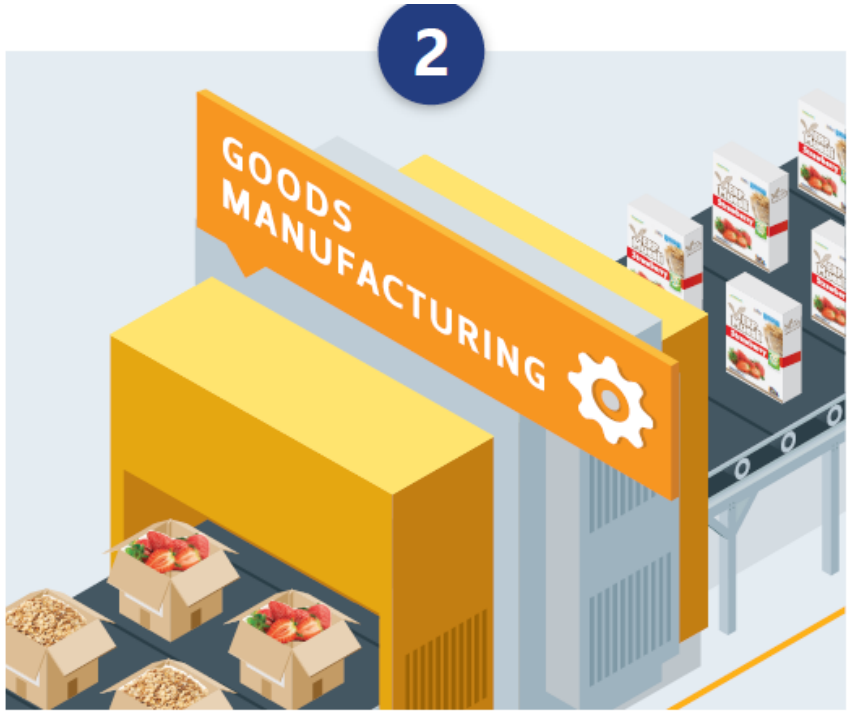

3 Click on Repay

4 Click on Post

PRODUCTION CAPACITY	
Capacity (units/day)	24 000
Additional Capacity (€ per 1 000 units)	1 000 000

$$\text{Capacity} = \frac{\text{Account \#11000 Balance*}}{1\,000}$$

**Machinery and equipment account*

INCREASE CAPACITY

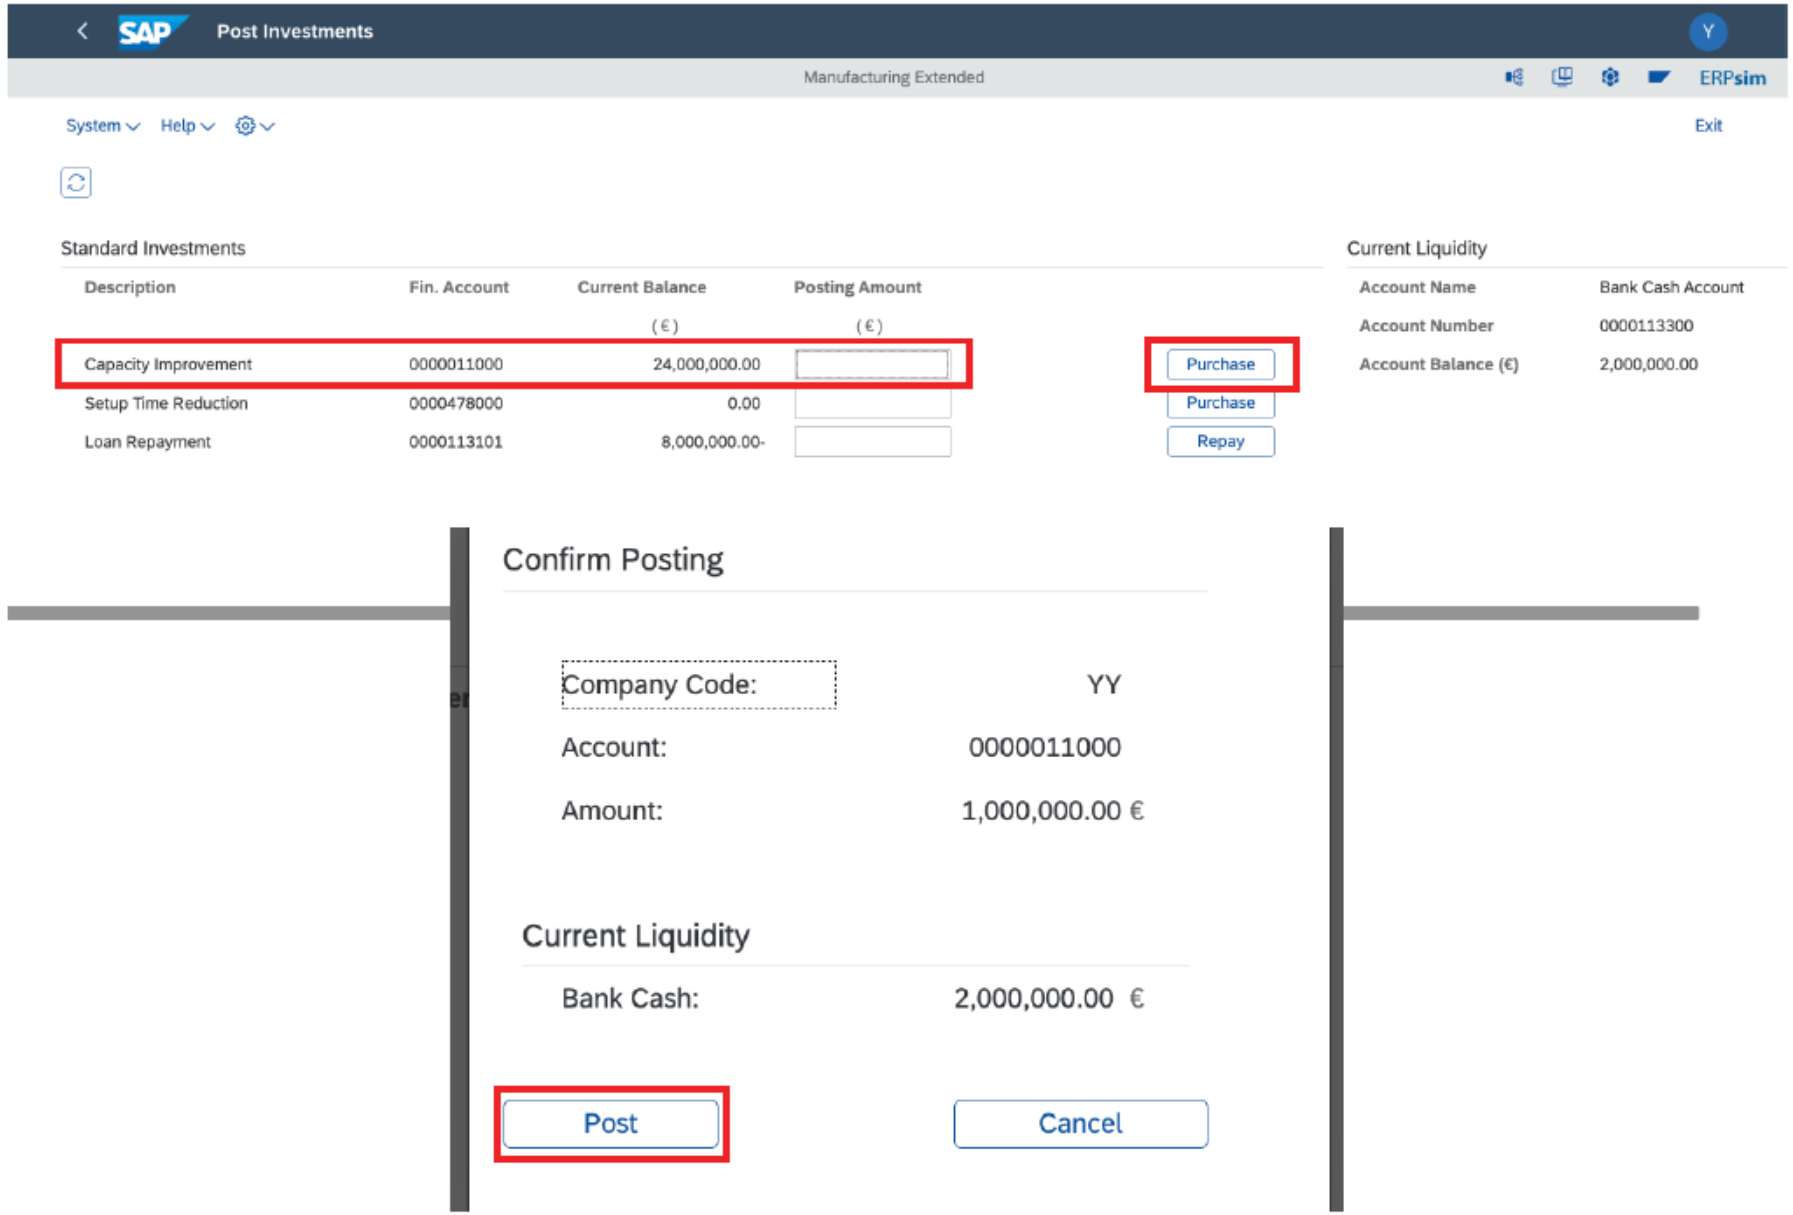

G/L Account Posting (ZFB50)

1 Under *Standard Investments*, in *Capacity Improvement* line:

2 Enter the *Posting Amount*

3 Click on Purchase

4 Click on Post

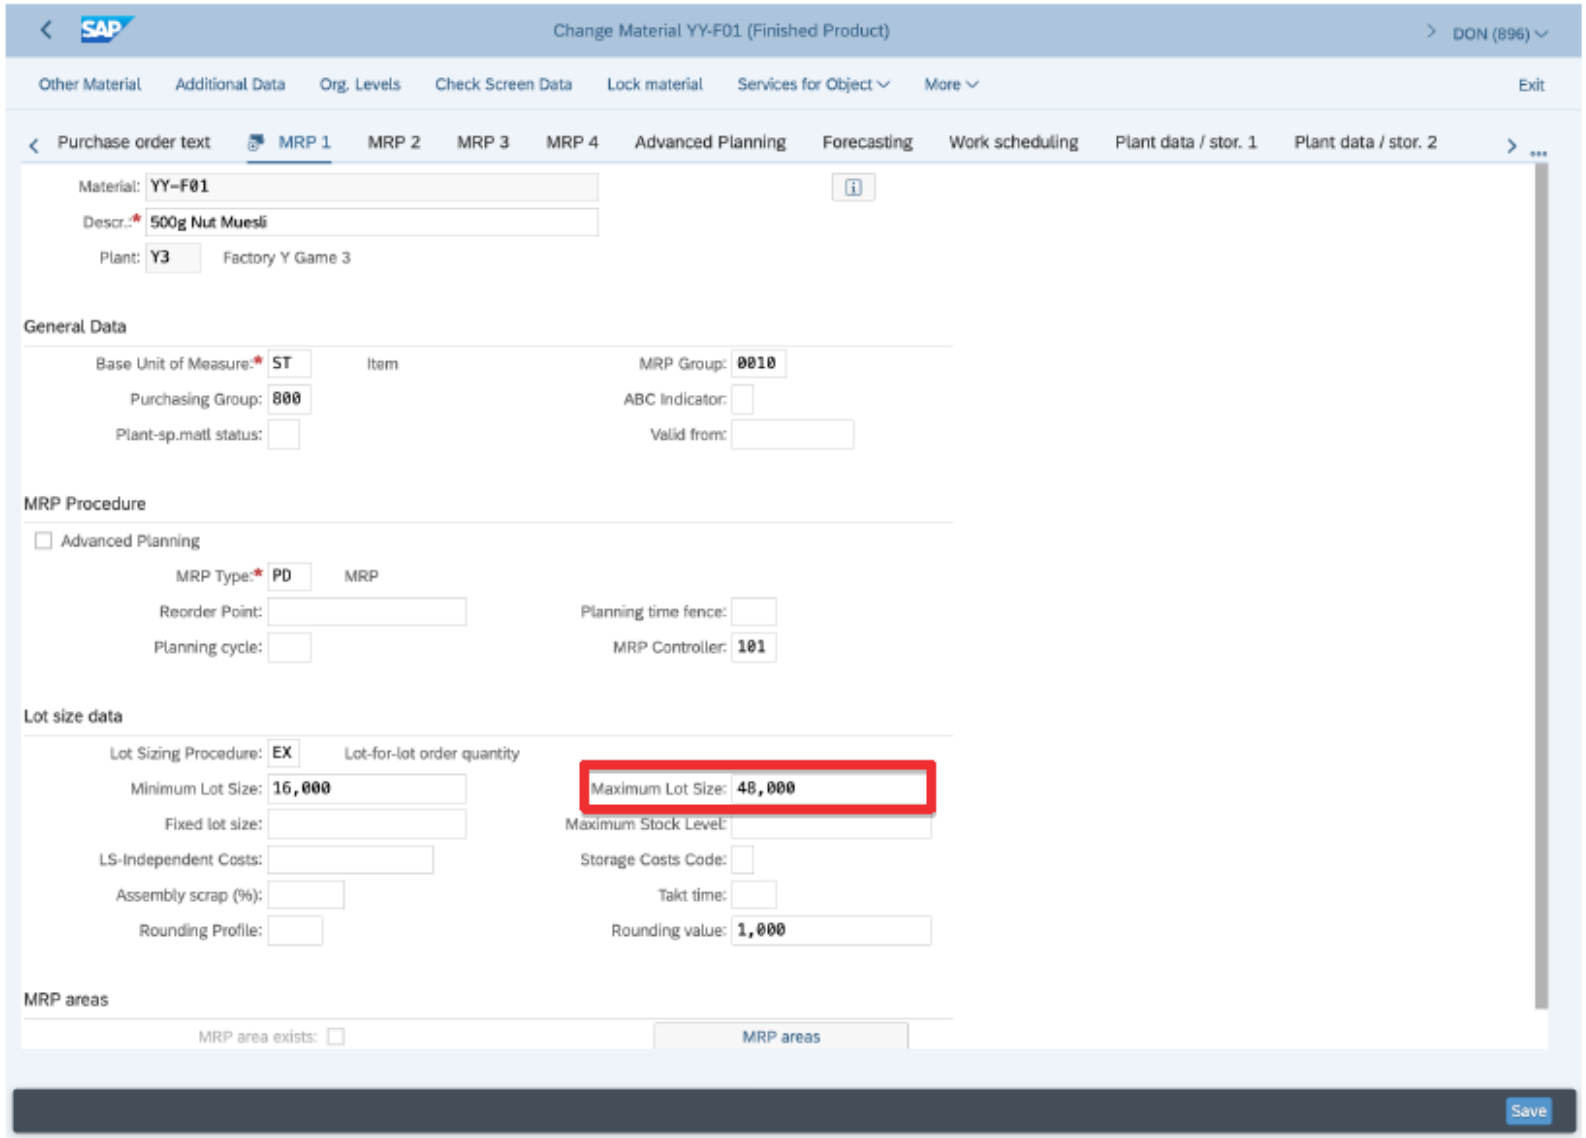

UPDATE LOT SIZE

Change Material (MM02)

1. In *Material*, enter the following information: $$-F##
2. Click on **Continue**
3. In *Select View(s)* choose **MRP1** and press Enter
4. In *Plant*, enter your company code* and press Enter
5. In *Maximum Lot Size*, update your lot size
6. Save

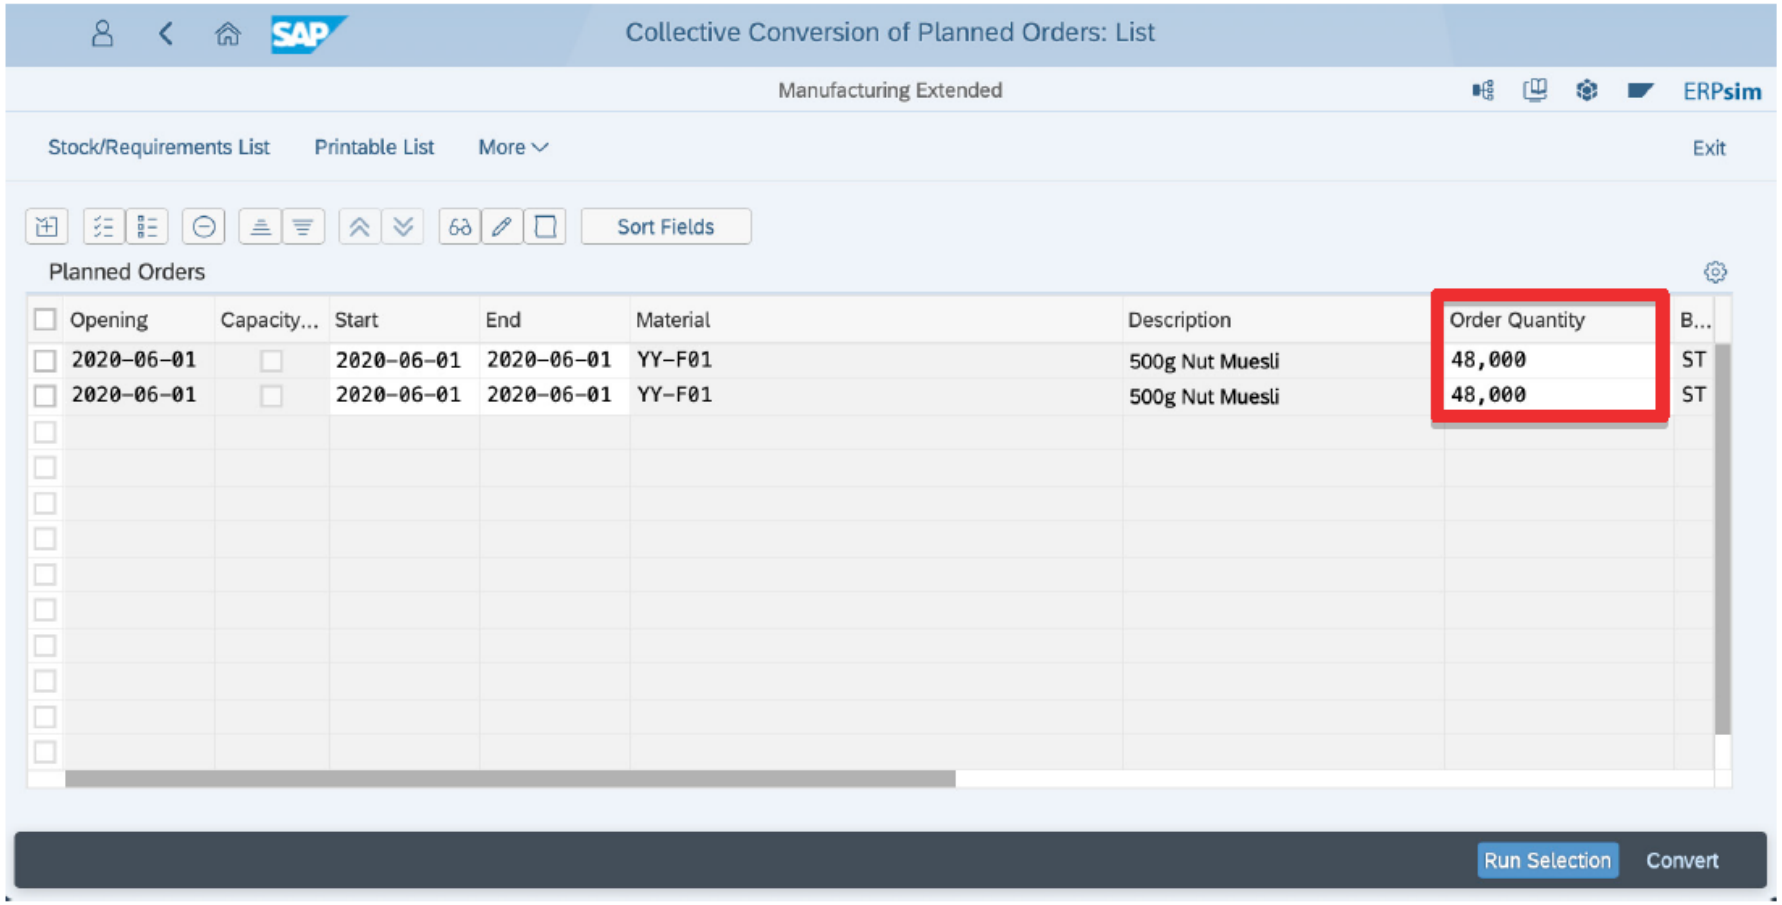

* To find your company code, refer to transaction ZORG (Organizational Structure)

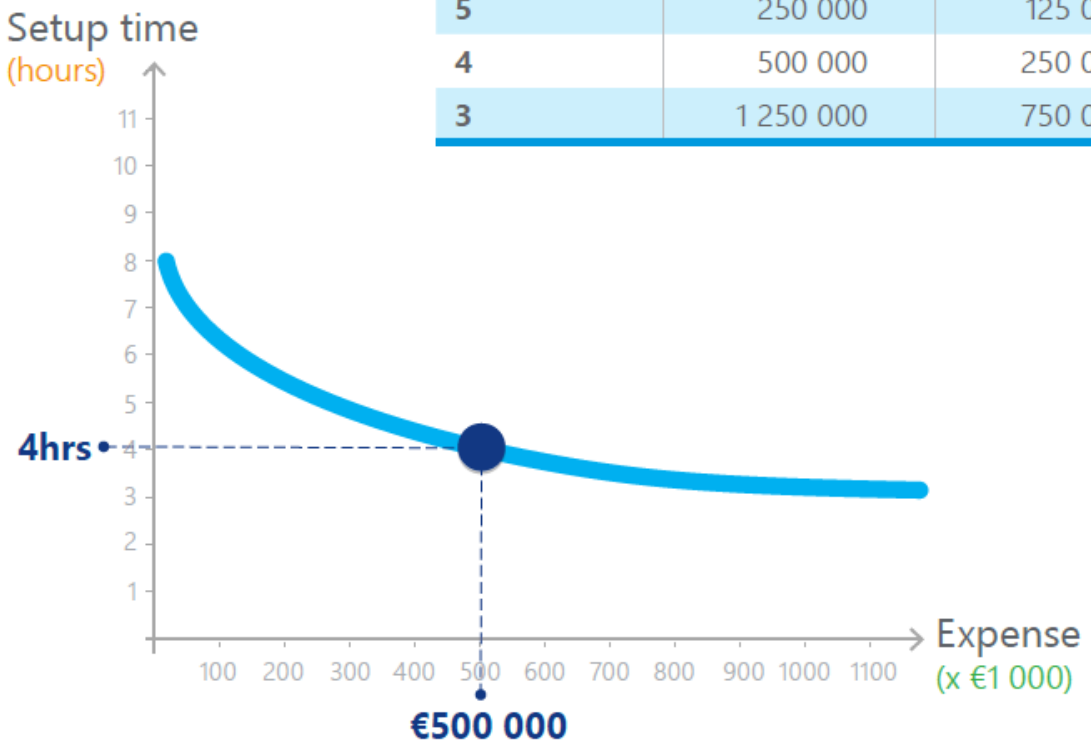

WARNING: This transaction can only be used before the game starts and in between rounds.

Planned order quantities depend on forecast levels, minimum lot size and maximum lot size.

Therefore, updating the maximum lot size of a product will have an impact on its planned order quantities.

SETUP TIME (hours)	EXPENSE (€)	MARGINAL EXPENSE (€)
8	–	–
7	50 000	50 000
6	125 000	75 000
5	250 000	125 000
4	500 000	250 000
3	1 250 000	750 000

The exact formula for calculating the set up time as a function of expense:

$$\text{Setup Time} = 2 + \frac{6 \times 250\,000}{250\,000 + \text{Account 478 000 Balance*}}$$

**Lean manufacturing expense account*

SETUP TIME REDUCTION

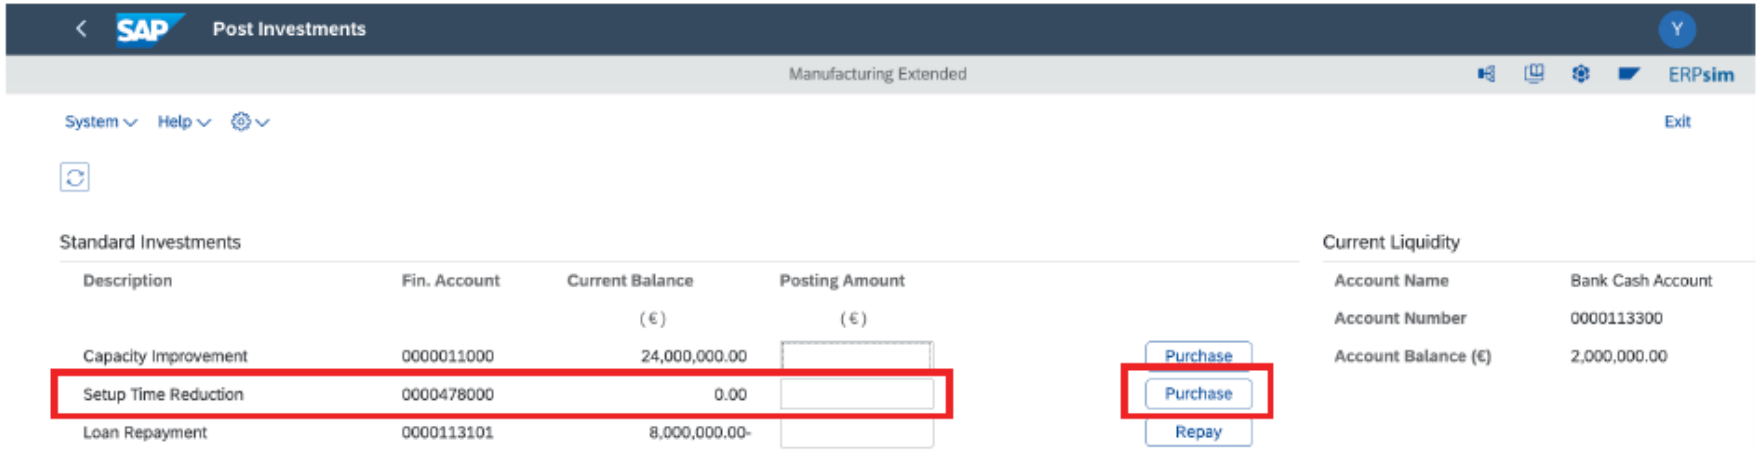

G/L Account Posting (ZFB50)

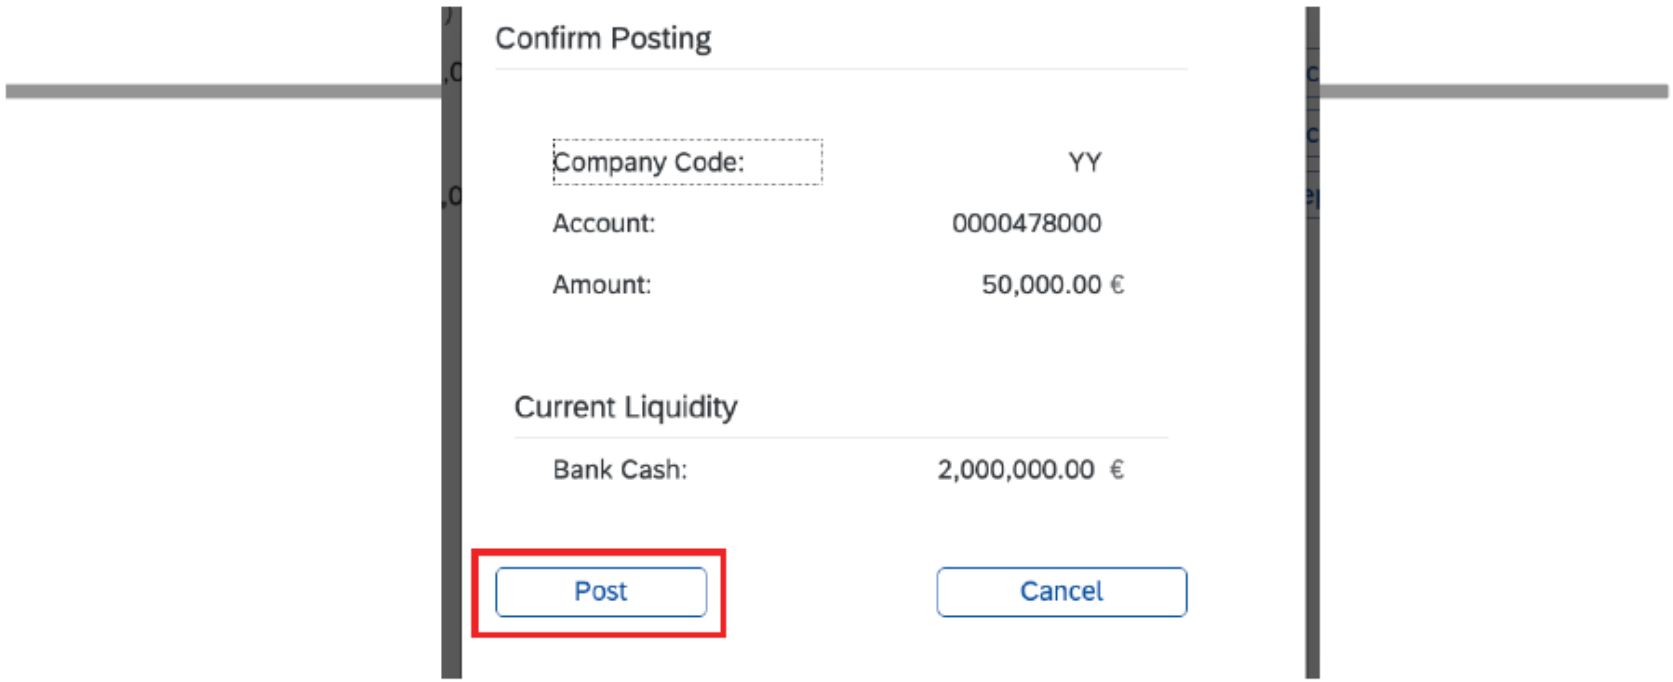

1 Under *Standard Investments*, in *Setup Time Reduction* line:

2 Enter the *Posting Amount*

3 Click on Purchase

4 Click on Post

Modify Bill-of-Material

Modify Bill-of-Material

CHANGE PRODUCT DESIGN

Validated BOM Change (ZCS02)

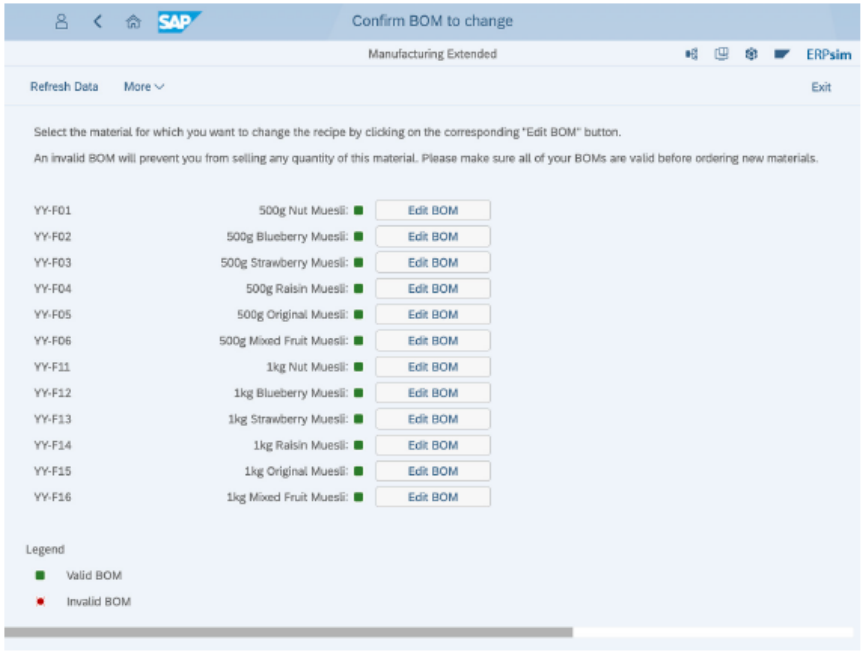

1 Select the material to change by clicking on

2 Change quantities and Save

! If received error messages, click on Continue to modify the entries
